Create a multitude of visual effects using this highly flexible multi input video processing unit for Video Walls and PIP/POP

The Smart-e **4K-2500** is a highly integrated compact unit capable of multiple functions using its internal Video processing engine. The **4K-2500** can be used as a 4x4 seamless switching and scaling matrix, 2x2 video wall processor and the added ability to act as a quad-split PIP/POP processor with multiple user selectable layout options.

The **4K-2500** can be used as flexible video processor or a 4x4 seamless HDMI matrix with fast switching speeds of less than 40ms. Four HDMI outputs designed to connect to four HDMI compliant monitors. Can downscale video resolutions to 720p/1080p/2560x1440/1920x1200 and 1360x768. Individual outputs can be adjusted for X,Y offset, mirroring and rotation and the ability to disable the video.

Multiple control options are provided including: front panel button control, infra-red control via the provided handset or remote-control options of RS232 or TCP/IP for interfacing to an external control system. An internal web browser is also available for configuration and control whilst an on-screen display (OSD) completes the comprehensive range of control methods.

The **4K-2500** has comprehensive EDID management allowing users to assign the EDID values from 1080p to 4K to any of the four inputs maximizing the quality of the source material.

Two channel stereo audio is accommodated within the HDMI signal and can be delayed up to 250ms for each individual output, allowing for the video processing duration.

The 4Kconnect range is from a family of digital extenders & matrices using standard CAT 6-8 STP cable to transmit HD signals over long distances
