cable up to 50m**

The **SDSC-1050** is a flexible and cost effective transmitter and receiver pair solution for extending 4K 18Gbps HDMI resolution video together with Infrared signals and POC (remote power over cable). The pair of units are supplied as a separate compact transmitter (**SDSC-TX1050**) together with its complementary compact receiver (**SDSC-RX1050**).

The **SDSC-TX1050** transmitter has a looping HDMI input allowing multiple transmitters to be cascaded together or add an extra remote display to an existing Digital Signage installation. The local HDMI loop out also provides a convenient method of monitoring the image being shown at the remote end.

The **SDSC-RX1050** receiver unit connects to the wall plate via a single Cat 6/6a cable at a distance of up to 50m. The receiver presents the video out on a single HDMI connector and allows a 12V power supply to be connected which also powers the transmitter wall plate through the Cat cable.

Owing to its compact size and low cost the **SDSC-1050** is ideal for Schools and Further Education applications but can also be used for any meeting/board/huddle room requirements.
